

# ***Scientific Pest Control***

## **Chemical-Free Freezing Preparation Sheet**

**In order for our company to provide the most effective service possible, we ask that before our arrival your review and complete all the necessary steps listed below. Please complete and return this form to the scientific pest control technicians when they arrive on the site. If you fail to complete the following requests it may delay the treatment and potentially void and guarantee if applicable.**

**Preparation steps include:**

- ☐ **We recommend washing all clothing that could have come into contact with the bedbugs. This is especially the case for clothing on the floor, from suitcases and in drawers in dresser. Hanging clothing, provided it doesn't touch the floor, should be okay.**
- ☐ **Remove all blankets, bed top, duvets, and pillow slips - should be taken to the laundry and wash and dried at least for 45 minutes to 1 hour on the hottest setting. If it is carpet floor we recommend a vacuum before we arrive.**
- ☐ **Remove all clutters; such as cardboard boxes, unnecessary items, etc. Technician may move items for treatment as they need the space; they may not be placed back in original place. Please ensure that technicians have enough space to work around or to move things in a different position.**
